INDEX TO VOLUME 70

*Starred items are "Shorter Notes"

Alexander, J. C. *The additive inverse eigenvalue problem and topological degree*, 5.

Aupetit, Bernard. *La deuxième conjecture de Hirschfeld-Żelazko pour les algèbres de Banach est fausse*, 161.

Benci, V. and Fortunato, D. *On a discreteness condition of the spectrum of Schrödinger operators with unbounded potential from below*, 163.

Burns, D., Jr. *Remark on the zero locus of a smooth function*, 83.

Carrell, James B. *A remark on the Grothendieck residue map*, 43.

Chandler, Richard E. and Tzung, Fu-Chien. *Remainders in Hausdorff compactifications*, 196.

Dang-Ngoc, N. and Royer, G. *Markov property of extremal local fields*, 185.

Ephraim, Robert. *Stein manifolds on which the strong Poincaré problem can be solved*, 136.

Erdös, Paul and Nathanson, Melvyn B. *Sets of natural numbers with no minimal asymptotic bases*, 100.

Feingold, Alex Jay. *Zones of uniform decomposition in tensor products*, 109.

Fortunato, D. See Benci, V.

Gard, Thomas C. *A generalization of the Nagumo uniqueness criterion*, 167.

Gibbs, David E. *Witt classes of integral representations of an abelian 2-group*, 103.

Goldstein, Jerome A. *On the operator equation $AX + XB = Q$*, 31.

*Goodman, Gerald S. *Integration by substitution*, 89.

Goodman, T. N. T. and Lee, S. L. *Another extremal property of perfect splines*, 129.

Inglis, Ian. *Multipliers on compact groups*, 151.

Janos, Ludvik and Martin, Harold. *Metric characterizations of dimension for separable metric spaces*, 209.

Joseph, James E. *Regularity, normality and multifunctions*, 203.

Kirk, R. B. and Rehmer, K. *A complete space of vector-valued measures*, 119.

Komal, B. S. See Singh, R. K.

Koornwinder, Tom and Sprinkhuizen-Kuyper, Ida. *Hypergeometric functions of 2×2 matrix argument are expressible in terms of Appell's functions F_4*, 39.

Kraljević, Hrvoje. *A note on nonunitary principal series representations*, 213.

Lau, Anthony To-Ming. *Characterizations of amenable Banach algebras*, 156.

Lau, Ka-Sing and Weil, Clifford E. *Differentiability via directional derivatives*, 11.

Lee, S. L. See Goodman, T. N. T.

Lemmert, Roland. *Unter-und Oberfunktionen und Differentialungleichungen zweiter Ordnung in normierten Räumen*, 173.

Liebetrau, E.-O. *The Fredholm radius of a bundle of closed linear operators*, 67.

Londen, Stig-Olof and Staffans, Olof J. *A note on Volterra equations in a Hilbert space*, 57.

Martin, Harold. See Janos, Ludvik.

*Millett, Kenneth C. *Piecewise linear embeddings of balls into contractible manifolds*, 85.

Moore, John Douglas. *Codimension two submanifolds of positive curvature*, 72.

Nathanson, Melvyn B. See Erdös, Paul.

de Paepe, P. J. *Some applications of the Stone-Weierstrass theorem*, 63.

*Papastavridis, Stavros. *An identity on algebras over a Hopf algebra*, 87.

Prestini, E. *A restriction theorem for space curves*, 8.

Priddy, Stewart. *$K(\mathbb{Z}/2)$ as a Thom spectrum*, 207.

Rankin, S. A., Reis, C. M. and Thierrin, G. *α-recognizable semigroups*, 93.

Rehmer, K. See Kirk, R. B.

Reis, C. M. See Rankin, S. A.

Royer, G. See Dang-Ngoc, N.

Sakai, Makoto. *A moment problem on Jordan domains*, 35.

Samelson, Hans. *On Darboux's lemma*, 126.

Schiffman, Stephen J. *A Samelson product and homotopy-associativity*, 189.

Shapiro, George S. *Unique balayage in Fourier transforms on compact abelian groups*, 146.

Singh, Niranjan, *A generalization of a theorem of Tutchell,* 49.
Singh, R. K. and Komal, B. S. *Composition operator on l^p and its adjoint,* 21.
Smith, Philip W. *An improvement theorem for Descartes systems,* 26.
Smorynski, C. *Avoiding self-referential statements,* 181.
Sprinkhuizen-Kuyper, Ida. See Koornwinder, Tom.
Staffans, Olof J. See Londen, Stig-Olof.
Størmer, Erling. *Stone's theorem and spectral subspaces of automorphisms,* 18.
Taft, Earl J. *Representable monoids,* 1.
Thierrin, G. See Rankin, S. A.
Tzung, Fu-Chien. See Chandler, Richard E.
Washington, Lawrence C. *Erratum to "Relative integral bases",* 92.
Weil, Clifford E. See Lau, Ka-Sing.
Weintraub, Steven H. *Group actions on homology quaternionic projective planes,* 75.
Whitley, Robert. *Normal and quasinormal composition operators,* 114.
Whitman, P. N. *Approximation of induced automorphisms and special automorphisms,* 139.
